*Lavender, Peppermint, Frankincense,  
Peace & Calming, Purification, Panaway, Valor,  
Thieves and Lemon.*

## THE EVERYDAY OILS KIT

***The Everyday Oils Kit*** was created by Young Living Essential Oils (YLEO) so that anyone could immediately use and appreciate the benefits of therapeutic-grade essential oils. The Kit contains Four single oils: *Lavender* (*Lavandula Angustifolia*), *Frankincense* (*Boswellia carteri*) *Peppermint* (*Mentha piperita*), and *Lemon* (*Citrus Limon*) plus five oil blends: *Valor*, *Thieves*, *PanAway*, *Peace & Calming* and *Purification*.

- All single oils may be used as dietary supplements.
- All of the oils may be diffused. The diffuser from YLEO is a special air pump that is custom designed to disperse the oils in a micro fiber vapor. This allows the oils to stay suspended in the air to reduce bacteria, fungi and mold. It also freshens the air with natural fragrances, eliminating the need for synthetic, harmful air fresheners. The diffuser disperses the oils without heat, which could render the essential oils less effective. *When inhaling it takes 22 seconds for an oil to reach the brain.*
- All of the oils can be applied to the Vita Flex points on the feet (see diagram on page 10,11), added to bath water mixed with YLEO's Bath Gel Base, applied topically or used with body and foot massage. *When applied topically it takes 2-3 minutes for an oil to reach the bloodstream...20 minutes to effect every cell in the body, then metabolized within 2 1/2 hours.*

**\*THESE 110 SUGGESTED USES APPLY ONLY TO THE USE OF THERAPEUTIC GRADE, YOUNG LIVING ESSENTIAL OILS.**

**PLEASE CAREFULLY READ AND FOLLOW THE GUIDELINES FOR THE SAFE USE OF YOUNG LIVING ESSENTIAL OILS INCLUDED AT THE END OF THIS DOCUMENT.**

## Common “Scents” Precautions

### *Guidelines for the Safe Use of Young Living Everyday Oils Kit*

Therapeutic-grade essential oils are strong and safe when used as directed. Below are some preventative precautions to help you have an enjoyable experience using Young Living Essential Oils.

- Always test for skin sensitivity and keep a bottle of V-6 vegetable mixing oil, massage oil base or any pure vegetable oil handy when using essential oils. Vegetable oils dilute essential oils if they cause discomfort or skin irritation. Water does not help.
- Read the complete label before using essential oils.
- Keep bottles of essential oils tightly closed and store them in a cool location away from children. If a child swallows an essential oil, administer milk, honey or another safe, oil-soluble liquid such as soy or rice milk.
- Do not use essential oils rich in menthol (such as Peppermint) on the throat or neck area of children under 30 months (2 ½ years) of age.
- The citrus-based oils of Bergamot, Grapefruit, Lemon, Orange and Tangerine as well as oil blends with a heavy citrus concentration such as White Angelica and Purification should not be used on areas of the skin that will be exposed to the sun or UV rays within 72 hours. They may cause an increased reaction to the sun.
- Keep essential oils away from the eyes and out of your ears. Do not handle contact lenses or rub your eyes with essential oils on your fingers. If the oils should get into your eyes, soothe with a drop of vegetable oil, not water.
- Oils with a high phenol content – Oregano, Helichrysum, Cinnamon, Thyme, Clove, Lemongrass, Bergamot, Thieves, and ImmuPower – may damage contact lenses and irritate eyes. Be sure to wash your hands thoroughly before handling contact lenses.
- Epileptics and those with high blood pressure should consult their health care professional before using some essential oils. Avoid Hyssop, Fennel and Idaho Tansy oils.
- Before taking GRAS (Generally Regarded as Safe by the FDA) essential oils internally, always dilute with an oil soluble liquid like honey, olive oil or soy milk.
- Do not add undiluted essential oils directly to bath water. Use Bath Gel Base as a dispersing agent for oils in the bath.
- Pregnant women should consult their health care professional before using essential oils containing constituents with hormone-like activity, such as Clary Sage, Sage, Idaho Tansy, Juniper and Fennel.
